 **H Design**
HYGIENIC SYSTEMS BY ATT

Perfection in Hygiene Design
of Drainage Systems

Ladder grating

Grating without edges for higher hygiene.

Ladder antyslip grating

Ladder grating with antislip surface.

Plate grating

Hidden flat bars to prevent from formation of dirt on edges.

Standard Design**Mesh grating**

Deburred edges to minimize accumulation of solid residues that could be a source of bacteria.

Perforated sheet grating

Hidden flat bars to prevent from formation of dirt on edges.

Ladder grating

Fully welded flat bars.

Hygienic deep pressed floor drain top, without sharp corners, enables self-cleaning and blocks bacteria growth.

Deep pressed body, without sharp edges and weld joints on corners prevents from accumulation of contamination and provides self-cleaning effect.

Butt welding technology. No welding joints in corners.

Continuous welding prevents from dirt accumulation.

Folded edges. Rounded or curved bottom.

Levelling feet made of stainless steel.

Waste basket

Deep pressed, without welding, single hygienic element for effective cleaning and removal of solid wastes.

Trap

The inverted trap provides maximum protection against odors and bacteria penetration.
