ATT CASE STUDY

Meat processing
– sausage production

www.att.eu

CUSTOMER

Project: Semić

Location: Visoko, BOSNIA - HERZEGOVINA

Application: Meat processing – sausage production

PROJECT BACKGROUND

SEMIĆ is a family-owned company with a long tradition in meat production and processing. SEMIĆ produces high quality products, such as:

- Traditionally elaborated meat and sausages (cured and smoked)
- Fresh sausages
- Minced meat, meatballs and hamburgers

For its new facilities built in year 2015, which are Halal, ISO 9001 and HACCP certified, SEMIĆ relied on ATT's drainage and food processing products.

ATT manufactured 100 meters of customized, stainless steel channels, 56 floor drains and a big range of stainless steel trolleys and bins:

Installation place	Product	Units delivered
Production and packing rooms	Floor drain, upper frame dimensions 250x250mm, outlet diameter 110mm, material stainless steel AISI 304	56
Process rooms	Standard Channel, width 200 mm, length 14 meters, 2 outlets diameter 157mm, stainless steel AISI 304	1
Process rooms	Standard Channel, width 200 mm, length 11 meters, 4 outlets diameter 157mm, stainless steel AISI 304	1
Packing rooms and aisles	Slot Channel, total width 60 mm, slot width 20 mm, length 5 meters, 1 outlet diameter 110mm, stainless steel AISI 304	15
Production	Smoking trolley, type H, 8 shelves, stainless steel AISI 304	170
Production	Meat bin, capacity 200 L, stainless steel AISI 304	50
Production	Transport cart, dimensions 410x655 mm, stainless steel AISI 304	10
